INFORMATION BULLETIN

ENVIRONMENTAL HEALTH REPORT

July – September 2022

HEALTH

This report is to highlight issues and activities ongoing within the environmental health area for the period July - September 2022

Covid-19

- Transition to evolving covid recovery phase, various Directions being revoked
- Easing of covid restrictions

Events

- Newdegate Machinery Field Days event application approved
- Newdegate Centenary event application approved

Food Businesses

Inspected the following premises for Food Act compliance-

- Newdegate Roadhouse
- Newdegate IGA
- Newdegate Hotel
- Newdegate Recreation Centre
- Newdegate Motel and Caravan Park

Food Recall Notices circulated to all food businesses

- Jenny Craig Melting Moments
- Coles Tomato Paste
- Harris Smokehouse Smoked Salmon Pates
- Häagen-Dazs ice cream
- Reese's Dipped Pretzels
- Cleanfit Plant Protein Bar Chocolate Brownie
- Harris Smokehouse Smoked Fish
- ALDI Sprinters Crinkle Cut Multi Pack Chips
- Genobile Saba Australia pizzas
- Brownes Dairy Mango Yoghurt 120g
- Ballistic Beer Co. beers

- CRUDO and Bocadilla ready to eat meals
- Eagle Bay Brewing Company XPA
- Herbie's Spices

Lodging Houses & Caravan Parks

Inspected the following for compliance -

- Newdegate Motel and Caravan Park
- Lake King Caravan Park unapproved structures (ongoing)

Onsite Effluent Disposal Systems

- Lake King Tavern Public toilet
- Lake King RV dump point
- Lake King Pavillion

Pool Water Sampling

- End of public pool season

Public Buildings

Inspected the following for Health Public Buildings compliance-

- Newdegate Recreation Centre

Recycled Water Scheme

- Chlorination plant installation completed
- 6 weeks of laboratory water samples underway prior to operational approval from Department of Health

Stallholder / Street Trading Permits

- Mrs G's Food Van

Waste Management

- Ongoing inspections of waste facilities
- Enquiries regarding asbestos disposal
- Enquiry about disposing of contaminated soil
- Annual Waste and Recycling Return to Department of Water and Environmental Regulation

Other

- Department of Health mosquito surveillance for Japanese encephalitis survey
- Dealing with complaint about unapproved business operating within Newdegate residential area
- Department of Health Annual Public Health Act and Food Act Report submitted
- Public Health Plan adopted by Council, copy of Plan on Shire website
- Central Region Health and Building meeting
- Annual Waste Conference

Introduction

This document is prepared for the Shire of Lake Grace Council to illustrate visiting statistics to the Lake Grace Visitor Centre.

It is a snapshot of visitor profiles that visit our shire and is not all inclusive. The Lake Grace Visitor Centre (LGVC) only records visitors that physically enter the centre. The use of signage, open flags and being positioned in the main street of town we feel we are getting the majority of genuine visitors calling into the centre.

One of the goals of the LGVC is to provide accurate information for visitors. We also want to provide an enjoyable experience for the visitor by sharing our history with them, i.e. through telling them about the Station Masters House. While in the LGVC we dispense brochures and maps highlighting places to see and things to do in our Shire foremost.

Equipped with additional information about the Shire of Lake Grace and its attractions, the tourist is more inclined to spend more time seeing and doing things in the Shire of Lake Grace. If they have the time visitors often add additional time in Lake Grace after visiting the Centre.

The graphs presented in this document are tracking several different measurements of tourism data. It must be remembered that not all visitors are comfortable with revealing information of their travels so it is based only on the information that has been offered and is not conclusive.

Visitor data measurements recorded include;

- Number of people
- Age
- Origin
- Route
- Mode of transport
- Accommodation
- Yearly tracking from 2014

Origin of visitors to the Shire of Lake Grace

For the purpose of recording data visitors are classed into five groups;

- Locals – indicating they are from the town of Lake Grace. No purposeful travelling was required to visit the centre.
- Intrastate – this term is used to describe visitors from surrounding Shire of Lake Grace towns and the rest of WA, e.g. Newdegate, Kukerin, Wagin and Perth
- Interstate – this term is used to describe visitors from within Australia, including Tasmania who travel through the Shire
- International – this term is used to identify visitors from outside Australia including New Zealand
- Unidentified – Travellers who don't disclose where their place of origin.

Locals

The cooler months bring locals in for jams, preserves and wildflower information. What's captured the spike in interest in August was the launch of Bill Trevenen's 100-year Football book. This book has exceeded the authors expectations and flown out the door. It's brought many locals through the door that weren't even aware we were here. So great having a chat and letting more locals aware what we get up to in here.

The next few months as the weather warms up we are set to hosting more community events in hopes to boost our local numbers. Market Day and the Harvest Festival are already looking like big events well waited for.

Intrastate Travellers

We always drop in numbers this time of year as many chose to chase the warmer weather up north. Many Western Australians are travelling over east and overseas as there are no longer any travel restrictions.

This wildflower season always brings great interest to our region. Usually the end of August brings are well loved orchids. The Wave Rock Music Festival and the Kulin Bush Races were sold out events. This is a great kick back for our region with extra travelers in the area. Newdegate Machinery Field Day, Newdegate Centenary celebrations and the long weekend in September also increased the amount of traffic on our roads.

Interstate Travellers

With no travel restrictions to speak of it's been an absolute pleasure to welcome back so many interstate travelers. Queenslanders especially have made the trek after so many interruptions over the last few years. Grey Nomads in both cars alone and caravans have come in droves since September which we are LOVING!

International Travellers

Wonderful to see international visitors back too! Many are visiting family and friends with a bit of sightseeing included. Lots of New Zealand and English visitors. All so happy to be here.

Unidentified Travellers

A group of travelers we try our very best to engage with but keeping in mind some people wish to simply browse and have a look around. As the visitor numbers picked up we often had many people in the centre at once. We have noted some people prefer to keep in the background and not engage and others could talk for days!

The majority of these mystery people popped in for a quick browse or a quick query.

Direction of Travel

Known for our crossroads, our traffic consists off those heading to either Wave Rock/Hyden, Esperance, Albany or Perth. Wave Rock and Albany is where the crowds are favouring. A little too cool for Esperance at the moment.

Age Group

The information tracked in this graph is reliant on the recorders ability to judge ages of visitors, therefore probably not entirely accurate in all cases.

Its all Grey Nomads, young and older that are our confident travelers. We saw families during the school holidays and a continued interest in the AIM Hospital museum. Tours averaging 2 per day.

Popular Visiting Days

As we record our daily statistics it was interesting to note which days were popular amongst our visitors. This information over time can be used for staffing needs of the Visitor Centre along with tourism dollar spending in our shire. *This graph represents visitors from July – September 2022.*

Mode of Transport

People travel to and through our Shire in various forms of transport. We have recorded the transport used by those who called into the Visitor Centre. It's a great indication as to how people are moving through our region and how travellers are using our region. This data measures July to September 2021. There's been a huge increase in car travellers which would explain our local accommodation outlets low vacancy throughout this peak season.

Yearly Trends

The chart below shows the LGVC recorded visitor trends over the past eight years. There has been steady growth in visitor numbers to the Shire of Lake Grace annually. 2020 was heading to a great start and then covid-19 happened.

Amazingly last August we had record breaking numbers! We were so delighted to have more people through the door we didn't even notice. We're hoping the numbers keep coming through as the weather warms up. The wildflowers and healthy looking crops are starting to draw the crowds our way.

Lake King Library Report September 2022

September seemed busy with Field Days and Sports Carnivals but this led to a quiet month in the library. Playgroup didn't meet so Story Time was put on hold until next term.

The school holidays has seen a drop in users but this has left plenty of time to start planning and promoting our upcoming Harry Potter event which is to be held October 17th – 21st. Our new editions of the Harry Potter books are covered and ready to lend and the displays are coming together.

The State Library's Borrow box had a total of 28 audios and 5 eBooks borrowed by Lake King library members in September. The Libby (Overdrive) platform had 0 audio books, 4 eBooks and 2 magazines downloaded by patrons.

Statistics Interlibrary Loans

September VDX Lake King Requests received 0

VDX Responded to other Library requests 0

We have one request yet to ship and a couple of requested books that are on their way however the delivery satchels have not been turning up weekly. We have gone more than 6 weeks without a delivery which is reflected by the inter library loan statistics. This has been followed up with the State Library so hopefully will resume in October.

Newdegate Library Report to 30/09/22

September was a quiet month for the Library as Newdegate was a hive of activity with the Machinery Field Days and Centenary. People may not have had the time to borrow and read books, but the Library area was still an extremely busy place with Community members using the area to work on projects for both events.

I have requested that the Shire purchase a copy of the Centenary Book for the Library.

The last Library exchange was 30 new items.

Interlibrary Loans 2 sent items

Moved: Cr Frank Cvitan JP, City of Wanneroo

Seconded: President Cr Phillip Blight, Shire of Wagin

That the 2022 Annual Report, including the 2021/22 Audited Financial Statements, be received.

CARRIED

3. Consideration of Executive and Member Motions

3.1. Road Traffic Issues

Shire of Dardanup

RESOLUTION

Moved: President Cr Michael Bennett, Shire of Dardanup
Seconded: Cr Tyrrell Gardiner, Shire of Dardanup

That WALGA Advocate on behalf of the local government sector to the State Government and in particular, Main Roads, to increase importance and weight given to local knowledge and input regarding road traffic issues including requests for speed reduction, intersection treatments and overall preventative and traffic safety measures.

CARRIED

MEMBER COMMENT

The Shire of Dardanup and its community have experienced a number of instances where preventative action was only taken after fatalities occurred on roads and intersections, despite pleas and requests from the local government, community and stakeholders.

Recent examples include the following intersections:

- Hynes Road on Forrest highway, fatalities occurred before safety concerns were addressed and speed limit reduced;
- Hynes Road on South Western Highway, fatalities occurred before safety concerns were addressed and speed limit reduced;
- South Western Highway section from Hynes Road westbound to Picton, high number of fatalities occurred before safety concerns were addressed and speed limit reduced;
- Eaton Drive numerous intersection designs, almost 10 years of traffic studies paid for by the local government as requested by Main Roads which eventually culminated in a treatment plan for all intersection that was agreed to by Main Roads South West, but rejected by Main Roads Perth request further traffic studies delaying action and deferring addressing community and safety concerns.

SECRETARIAT COMMENT

The Commissioner for Main Roads has the authority to erect, alter or take down any road sign or traffic control signal under the provisions of Regulation 297 of the *Road Traffic Code 2000*. This authority has not been delegated to Local Governments, except under very limited conditions. To effectively manage the local road network Local Governments need to work with Main Roads WA Traffic Management Services. The issues identified in the motion are consistent with the experience of other Local Governments.

In response to advocacy from WALGA and Local Governments, Main Roads WA undertook a review of the Speed Zoning Policy and Application Guidelines in 2020. Following adoption of the new policy, 52 Local Governments that had applied one or more times to amend a speed zone completed a survey undertaken by WALGA in 2021 which found that a higher proportion of applications to reduce speed limits on local roads were rejected under the new policy than was previously the case. Local Governments highlighted that the process was slow, somewhat unpredictable and lacked feedback indicating changes are required.

The proposed motion is broadly consistent with the WALGA State Council advocacy position in relation to travel speed management;

1. That the Road Safety Council initiate the development of a comprehensive speed reform plan. That the speed reform plan be designed, to meet the various needs of metropolitan, rural and remote Western Australian communities, with the aim of improving liveability, amenity and safety.
2. That a speed reform plan incorporates:
 - a. measures to ensure that Local Governments are consulted in the process of changing speed limits on the local road network, and
 - b. processes to reduce the barriers and red tape for Local Governments seeking lower speed limits in targeted locations on local urban roads.

[September 2019 – 99.6/2019]

Main Roads WA has evolved its policy position in relation to intersection treatments in the past three years such that “roundabouts or other treatments will be preferred over traffic signalisation, unless evaluation clearly demonstrates those other solutions are unsuitable”¹. There have also been significant technical changes in the modelling required, including the type of software to be used to demonstrate the effectiveness of the proposed intersection treatment². These new policies and operational requirements were introduced without adequate consideration of the long planning timeframes associated with road network development.

² Main Roads WA 2021 [Operational Modelling Guidelines](#)

3.2. Car Parking and Traffic Congestion Around Schools

City of Wanneroo

RESOLUTION

Moved: Cr Frank Cvitan JP, City of Wanneroo

Seconded: Cr Glynis Parker, City of Wanneroo

That WALGA engages with the State Government on behalf of Local Government to review issues associated with car parking and traffic congestion around school sites including but not limited to:

- 1. Reviewing car parking standards for schools;**
- 2. Ensuring sufficient land is set aside for the provision of parking on school sites;**
- 3. Reviewing the co-location of schools to avoid issues being exacerbated;**
- 4. Restricting school access from major roads;**
- 5. Developing plans to enable schools to manage school traffic;**
- 6. Develop programs to educate drivers; and**
- 7. Develop options and implement initiatives to encourage alternative modes of transport to school.**

CARRIED

MEMBER COMMENT

Background

The City of Wanneroo has for some time been concerned about traffic congestion and car parking in and around school sites. In particular, the City is concerned about the car parking and congestion issues that occur over the morning drop-off and afternoon pick-up times due to the high demand and intensity of activity over relatively short periods of time. Causes seem to range from a lack of parking availability, lack of adequate drop-off and pick-up areas and driver behaviour. The results observed by the City include illegal parking and traffic movements leading to conflict and potentially dangerous situations.

As an outer metropolitan growth council, the City of Wanneroo will continue to face the issue of car parking and traffic congestion unless measures are taken to address the increasing challenges and issues associated with schools throughout the City.

It is apparent that the issue of car parking and traffic congestion around schools is not exclusive to the City of Wanneroo. It follows that a comprehensive and coordinated approach to the problem is called for. This motion is submitted to request that WALGA take a lead role in helping bring about such a solution on behalf of all member councils.

Comment

There is a need to approach the State Government to identify and implement new approaches that can contribute to a comprehensive solution. These include:

- Reviewing parking standards for educational establishments;
- Ensuring sufficient land is set aside for the provision of parking on school sites;
- Reviewing the co-location of schools to avoid issues being exacerbated;
- Restricting school access from major arterial roads;
- Developing plans to enable schools to manage school traffic;
- Develop programs to educate drivers; and
- Develop options and implement initiatives to encourage alternative modes of transport for travel to and from school.

The City's Councillors are very concerned about the issues and are supportive of the City pursuing options to reduce the problems at existing schools and prevent them from occurring where new schools are developed. An example of the problem faced in relation to traffic and congestion has been highlighted by a Councillor. Mercy College in Koondoola is located at the intersection of two major roads (Beach Road and Mirrabooka Avenue) where it has been observed that:

- At school pick-up times, cars stop along Mirrabooka Avenue, approximately 200m before the intersection of Beach Road / Mirrabooka Avenue.
- The gate at Mercy College doesn't open until about 2:45pm. Cars are banked up from 2:30, causing significant congestion issues.
- A drop off / pick up entrance along Beach Road appears to be well managed, unlike the one on Mirrabooka Avenue.

The City has operated a school parking program to provide education, manage parking and where necessary take compliance/enforcement action. The City has also worked with the Department of Transport (DOT) *Your Move* team to help in the development of safe routes to school. Despite these efforts, issues of congestion and parking problems persist.

The City acknowledges the Department of Transport (DOT) report "*The declining rate of walking and cycling to school in Perth*" issued in November 2021. The City generally supports the conclusions and recommendations of the report and looks forward to the implementation of the actions proposed.

The City is also aware of the Department of Planning, Lands and Heritage Development Control Policy 2.4: School Sites and the draft operational Policy 2.4: Planning for School Sites. The former policy has been in place since 1998 and the issues of parking and traffic congestion have continued throughout its duration. While the draft policy discusses sufficient parking and embayments and facilities for drop-off and pick-up it does not appear to have measures in place to deal with the high demand and intensity of activity over short periods of time that deal with the resultant congestion and potentially dangerous situations. There is no requirement for schools to manage the traffic they generate.

The City of Wanneroo's observations are that the issue of car parking and traffic congestion occurs at schools in the entire Local Government area regardless of the type (public or private), age and location. That is to say that the issue has been occurring for many years and according to the DOT report has become more of an issue as the rate of walking and cycling to school has declined over the past 40 years.

There is a need for WALGA, as representative of Local Government, to lead discussions with the State Government to find a solution to the issue of parking and traffic congestion around schools.

Addressing car parking provision, driver behaviour and mode of transport can help reduce the issues occurring at schools.

The City's view is that addressing school location, improving safe pedestrian and cycle access routes, provision of safe bicycle storage facilities, ensuring sufficient car parking provision and drop-of/pick-up areas are provided, improving driver behaviour through education and mode of transport can help reduce the issues occurring in and around schools. Improved and safe pedestrian and cycle routes can lead to healthier outcomes for users and can contribute to stronger connected communities.

SECRETARIAT COMMENT

This motion outlines three key requests:

1. A wide-ranging review of standards and school location

There are two main types of schools: Public schools and private schools.

Land for public schools is required to be identified and set aside as part of the structure planning and subdivision process. Public schools are considered as public works, are not controlled by local planning schemes and are exempt from the requirement to obtain development approval. Consequently, Local Governments have limited direct control over the concerns raised in the motion for new public schools. Private schools, the demand for which usually materialises after neighbourhoods are well established, are controlled by local planning schemes and the parking standards and other requirements set out in these schemes.

Draft Operational Policy 2.4 (Western Australian Planning Commission 2020) is the primary planning policy that sets standards for new schools. This draft policy “is intended to assist in addressing issues that may arise in residential areas between schools and their surroundings particularly in respect of traffic and noise generating activities, and mitigation of impacts on existing transport network and services.” The policy sets standards related to minimum number of road frontages and road types, access to active and public transport connections, and requirements to provide traffic impact assessments. The policy was drafted in 2020 and will be finalised following the review of Liveable Neighbourhoods.

Liveable Neighbourhoods is the Western Australian Planning Commission’s primary policy for the design and assessment of structure plans (regional, district and local) and subdivision for new urban (predominantly residential) areas. This policy includes a component on education facilities, including particular design requirements for schools.

The finalisation of Draft Operational Policy 2.4 and current revision of Liveable Neighbourhoods provide opportunities for Local Governments and WALGA to seek amendments to these documents in accordance with member concerns.

2. Better management of traffic by schools and development of driver education programs

Driver behaviour, as well as transport mode choice, contributes to reducing the impact of traffic congestion and safety around schools.

3. Development of options and programs to alternative modes of travel to and from school

In May 2022 WALGA State Council endorsed the Draft Active Travel to School Roadmap, subject to amending Urban Environment Initiative No 1 to “Consult local governments to identify sub-regional school transport challenges and amend existing planning guidelines and develop new guidelines where gaps exist (RESOLUTION 337.4/2022).

State Council also resolved that WALGA:

- Works with the Department of Transport to finalise the Roadmap and encourage Local Government participation in the initiatives identified where these offer solutions to the local issues encountered in each area; and
- Uses the Draft Active Travel to School Roadmap to strengthen advocacy for increased funding for walking and cycling infrastructure in Western Australia by the State and Federal Government.

WALGA has some involvement with the Active Transport to School Working Group, which is led by the Department of Transport and includes representation from the Department of Education. The Department of Transport has developed a new category within the next round of WA Bicycle Network Grants to co-fund Active Transport Officers with Local Governments. This is an evolution of the former Travel Smart Officers with the new officers having a greater role in working with schools.

3.3. Proposal for Regional Road Maintenance Contracts with Main Roads WA

Shire of Dundas

RESOLUTION

Moved: President Cr Laurene Bonza, Shire of Dundas

Seconded: Cr Sharon Warner, Shire of Dundas

That WALGA assist Local Governments and work with the Hon Minister Rita Saffioti to introduce a similar program that is currently in play in Queensland and introduce a sole invitee Program for Local Governments to engage in a Road Maintenance Performance Contract with Main Roads WA.

CARRIED

MEMBER COMMENT

On 1 April 2022, the McGowan Labour Government [announced](#) it was returning up to 660 maintenance road workers back in-house to Main Roads.

An interactive Q-Trip Funding Tool ([here](#)) provided by the Queensland Government, details the next four years of State Government and Local Government Partnership providing safer roads and sustainability to regional and remote Shires.

To enable the Shire of Dundas to be involved in the direction of WALGA to assist with issues impacting us directly, and other regional resource communities impacted by the related Acts and Regulations.

Given the recent State Government announcement, there is an opportunity for all Local Governments to look at this proposal from WA State Government on how this proposal to keep jobs in house within Main Roads WA and the possibility to work with local governments when contracting the required road maintenance to Local Governments (see [here](#)).

It is suggested that the Queensland Government model, which can be viewed [here](#), works well and allows Councils to recover costs for usage of plant and equipment and recoup plant costs as hire charges against activities to cover all maintenance, depreciation and operating costs for Local Governments as agreed when undertaking joint routine maintenance on State controlled roads.

It is important that when developing this type of model and contract terms to get the document standards and the WHS and the Main Roads Preferred Suppliers correct. In Queensland, Main Roads assisted with these requirements in a partnership arrangement.

If Local Governments across WA are allowed into this space and work for the State Government on a contractual basis, it could be an opportunity to increase revenue significantly, especially in remote rural areas across WA. This would help Council cover cost relating to new imposed WHS Reforms, Local Government Reforms, Auditing Requirements, and associated costs.

SECRETARIAT COMMENT

The decision by the State Government to move to in-sourcing road maintenance delivery and management provides new opportunities for Local Governments to participate in delivering maintenance and minor capital work on the State road network. Local Governments and Regional Organisations of Council have previously contracted to Main Roads WA to deliver road maintenance services. There were several reasons that Councils and Main Roads WA decided not to continue with these arrangements. The Association will need to understand the interest and capacity of Local

Governments to undertake road maintenance work on the State road network, to inform engagement with the State Government.

The extent and type of road works that Main Roads WA will deliver using staff and those operations that will be delivered by contract are likely to vary in different parts of the State.

3.4. Northern Australia Beef Roads Program

Shire of Dundas

RESOLUTION

Moved: President Cr Laurene Bonza, Shire of Dundas

Seconded: Cr Sharon Warner, Shire of Dundas

That WALGA work with the Hon Madeleine King MP Minister for Resources and Minister for Northern Australia to make Beef Road Funding available to all Australian Local Governments north and south, or establish a Southern Australia Beef Road Funding Program to allow for equitable support across Australia's beef and agriculture industries.

CARRIED

MEMBER COMMENT

The extension to the south of the country of Roads and Beef Road Funding will be vital to get cattle to the saleyards and be competitive with their counterparts from the North who receive [Federal Funding](#) to assist them in their efforts to transport cattle.

Reliable access has always been the most significant issue facing the community and businesses operating in the remote Northern Nullarbor region and is a serious concern for those emergency service personnel who are called upon in times of crisis. The 2019-2020 bushfires which closed the Eyre Highway (effectively the gateway into WA) is an example of inaccessibility. The Trans Access Road is the only road servicing this area and has in the past been impassable for months due to flooding. This project would deliver transport efficiencies, stimulate and support economic activity, and provide a safer access road for regular users, tourists, and emergency service personnel. The Eyre highway is the number one strategic link into Western Australia. The Trans-Access Road is the only road East linking the Aboriginal Communities, remote roadhouses, and pastoral stations. Linking the two roads increases accessibility, safety, and improves the social service access between the communities on both roads. Cattle and sheep movements can be hampered when the Trans Access Road is closed, and WA freight movements (in and out) are hampered when the Eyre highway is closed, as per the bushfire season of 2020.

This road improvement will shorten the distance from 1,041 to 91.7km (within our Shire), making traffic movements more efficient, as well as safer with a better-quality formed road. The Commodities can get to market with increased certainty, safety, and more efficiently.

This is only the situation with one road and their numerous pastoral leaseholders having the same issues in Western Australia and all the southern pastoral leaseholders across Southern Australia.

See [here](#) a map showing Northern Australia Local Government Roads receiving Funding.

SECRETARIAT COMMENT

The Northern Australia Beef Roads Program was a \$100 million Federal Government investment within the \$980 million Northern Australia Roads Program, which is delivering upgrades to high priority roads in northern Australia essential to the movement of people and freight to support the North's economic development. The Northern Australia Beef Roads Program is making targeted upgrades to key roads necessary for transporting cattle to improve the reliability, productivity and resilience of cattle supply chains in northern Australia, thereby reducing freight costs and strengthening links to markets. The Federal Government announced projects to be funded in October 2016, and the program is now nearing completion.

A key feature of the Northern Australia Beef Roads Program was the active engagement with the beef industry and transport sector to identify potential projects and modelling of different scenarios by the CSIRO using the Transport Network Strategic Investment Tool (TraNSIT) to determine the benefits and assist in prioritising projects. Success in establishing a new Beef Roads Program in Southern Australia would likely require similar support and evidence. Northern Australia provides 90% of Australia's live cattle exports³.

The Northern Australia Program is framed around the [Our North, Our Future: White Paper](#) on Developing Northern Australia, with annual statements to Parliament on progress. It is outside of the Minister for Northern Australia responsibilities to establish funding programs in other parts of Australia.

Depending on the scale of investment required, a business case detailing the costs and benefits of the proposed upgrades will be required to underpin advocacy to State and Federal Ministers. The Hon Catherine King, Minister for Infrastructure, Transport and Regional Development of Australia is a primary decision-maker when seeking funding to respond to the identified needs.

³ Office of Northern Australia 2022 ([Office of Northern Australia | Department of Infrastructure, Transport, Regional Development, Communications and the Arts](#)).

3.5. 3D House Printing Building Compliance

Shire of Dundas

RESOLUTION

Moved: President Cr Laurene Bonza, Shire of Dundas
Seconded: Cr Sharon Warner, Shire of Dundas

That WALGA requests:

- 1. Assistance from Minister for Industry and Science The Hon Ed Husic MP, Minister for Housing and Homelessness, Small Business The Hon Julie Collins MP, Minister for Infrastructure, Transport, Regional Development and Local Government The Hon Catherine King MP to work with Ministers from all State and Territory Governments who have Building and Construction in their portfolios, to collaborate and to consider removing impediments within the National Construction Code Series and associated Australian Standards, that dissuade industry from adopting 3D printing as a building method.**
- 2. That the Government provide instruments to incentivise private industry to develop 3D printing and include this as an acceptable building practice.**

CARRIED

MEMBER COMMENT

Australia's construction industry may be in for a shake-up, with the arrival of commercial 3D house-printing technology capable of slashing build times and costs.

On the heels of the country's first 3D-printed house – erected in three days Melbourne in January - COBOD, an international leader in the disruptive field, has partnered with Australian company Fortex to distribute its equipment.

COBOD has spearheaded the development of 3D house-printing, having sold about 50 systems featuring multifunctional construction robots across the globe since 2019. They were used to help build the first single-, two- and three-storey 3D-printed dwellings in Europe, the first 3D-printed house and school in Africa, and first wind turbine tower base.

Unfortunately, laws, codes and regulations rarely keep pace with technology. This is the case for using 3D printing to construct houses.

The Shire of Dundas Elected Members supported this motion at the [Ordinary Council Meeting on 28 July 2022](#) (item 10.1.2 WALGA AGM item – 3D Building Compliance).

Australia is currently experiencing an unprecedented housing crisis. Staff and material shortages are now affecting all industries and especially impacting critical industries like housing construction. The construction of buildings in Australia is controlled through a legislative framework that includes reference to the need to comply with the National Construction Code (NCC) and the Building Code Australia (BCA). The NCC is a uniform set of technical provisions for the design and construction of buildings and other structures, including building systems throughout Australia. In WA the NCC/BCA is called up in the *Building Act 2011* and the Building Regulations 2012. It is a statutory requirement that a building or system must be demonstrated to achieve NCC/BCA compliance. The NCC is a performance-based code, containing all performance requirements for the construction of buildings. It's built around a hierarchy of guidance and code compliance levels, with the performance requirements being the minimum level that buildings, building elements, and systems must meet. A building will comply with the NCC if it satisfies the performance requirements, which are the mandatory requirements of the NCC. The performance requirements are also supported by general requirements. These cover other aspects of applying the

NCC including its' interpretation, reference documents, the acceptance of design and construction, including related evidence of suitability/documentation, and the classification of buildings within the NCC. The key to the performance-based NCC is that there is no obligation to adopt any particular material, component, design factor or construction method. This provides for a choice of compliance pathways.

At the [National General Assembly on 19-22 June 2022](#), Motion number 100 was presented by Murray River Council NSW.

Motion number 100 Murray River Council NSW

This National General Assembly calls on the Australian Government to collaborate with local government to remove impediments within the National Construction Code Series (BCA) and associated Australian Standards, that dissuade industry from adopting 3D printing, and the Government provide instruments to incentivise private industry to develop 3D printing.

OBJECTIVE

There is mounting financial pressure on governments, with limited fiscal levers available, to slow the price trajectory of housing. Major change across any industry is difficult for profit-driven entities, especially smaller players, to orchestrate, as simply the risk is high, the financial capacity is limited, and the reward will soon be diluted across their competitors. There are investigations into housing affordability occurring in NSW already, which is commendable. Further opportunities can be harvested if the state partners with local government to review the building codes (which by default do not currently reflect the new technology).

KEY ARGUMENTS

Often the scale of the research and development required is beyond even the most affluent or well-resourced. The longer an industry has been in existence, the harder it is to change, amplified by the educational institutions and financial commitments that both have long lead times and future commitments. Furthermore, regulations (in this instance building codes and standards) are always slow to change and are often an even bigger impediment. In August 2021, the first 3D printed houses were sold in the USA. The investment in research and development in 3D printed structures over the next few years in many counties, largely driven by price pressures, government policies, international treaty obligations, but also because of the frailty of global supply chains, is profound.

Housing affordability is now becoming critical, yet the policy levers appear to be slow moving. Although it will take some time to achieve, the initial indicators are that 3D Printed houses will lower prices. Therefore, it would be prudent to adapt our rules to facilitate.

Statutory Environment

- [National Construction Code \(NCC\)](#)

SECRETARIAT COMMENT

Changes to the National Construction Code - All components used for building work in Australia must meet certain performance and legal requirements. These requirements help ensure that buildings are safe, healthy for occupants and maintain performance over the expected life of a building. Following a building fire in Melbourne Docklands in 2014, and the cladding fire at Grenfell Tower in London in 2017 which killed 72 people, all State and Territory Building Ministers agreed to an assessment of the effectiveness of building compliance systems across Australia. The resulting Building Confidence Report, released in 2018, identified that problems exist with building product safety in Australia. Subsequently, all Building Ministers agreed to the development of a National Product Assurance Framework to strengthen building product performance requirements. A discussion paper outlining the proposed framework was released by the Australian Building Codes Board in 2021 and can be found [here](#). Any change allowing new forms of construction would require substantial evidence to be presented by industry to the Australian Building Codes Board.

Alternative construction methods such as modular buildings, buildings with pre-engineered components and Structural Insulated Panels (SIPS panels) have risen in popularity in Western Australia in recent years, partly in response to supply chain issues and labour shortages. For example, a display home was built in Mandurah from SIPS panels that was supplied and installed in 16 weeks. Strategies that seek to promote diverse housing options, supply and sustainability should consider the suite of alternative construction methods.

3.6. South West Native Title Settlement

Shire of Gingin

RESOLUTION

Moved: President Cr Wayne Fewster, Shire of Gingin

Seconded: Cr Andrea Vis, Shire of Gingin

That WALGA advocate to the State Government that Local Governments be provided with the full list of potential land to be requested for transfer as part of the South West Native Title Settlement and that a minimum of three months be provided for Council to provide feedback.

CARRIED

MEMBER COMMENT

The Shire of Gingin and many other Local Governments are being requested to consider parcels of land to be allocated for transfer as part of the South West Native Title Settlement.

The Shire of Gingin has received its third request, totalling approximately 45 parcels of land, for consultation as part of this process and in each instance is provided only 40 days to provide feedback to the Department.

For each land parcel in question, which can be numerous, Council is requested to consider the following:

1. Is the Shire supportive of the transfer of this land to the Noongar People under the Settlement?
2. Does the Shire have any interest in the land?
3. Does the Shire have existing or planned infrastructure within the land parcel that requires protection? If yes, please provide details and advise if access to this infrastructure will need to be maintained.
4. Is the land parcel subject to any mandatory connection to services?
5. Are any future proposals for the land identified? Please provide detail of what is proposed and in what timeframe?
6. Are there any future proposals for adjoining land that may affect the land identified in the spreadsheet? If so, in what timeframe?
7. Please advise of any proposed planning scheme amendments that may affect the zoning of this land at a State or Local Government level. If a scheme amendment is to occur, what is the change proposed and when will it come into effect?
8. Please advise of any known land management issues such as site contamination, hazards, debris or rubbish dumping, unauthorised land use and environmental considerations (such as inundation or similar site constraints).
9. Please provide any additional comments on the proposed transfer of this land as part of the Settlement.

The 40-day consultation does not provide any ability for Local Government to consult with the community regarding Council's support for the land transfer and as such is ignorant as to the changes in land management.

Local Governments, as part of this process, are not advised as to any intent for the future purpose of the land and/or how it is proposed to be managed into the future and this is creating angst as part of the consultation with Council. For example, it is difficult for any Local Government to approve the transfer of the land without understanding as to what purpose the land is being requested for and who will manage the area, and will it be freehold transfer? This advice may be as simple as the site is

requested for cultural significance or for commercial purposes and will be administered by SWLCC as a reserve vested.

The Shire of Gingin, through consultation with the Department, have been advised that within the Shire there are an additional some 230 more locations identified for potential transfer. The Shire, and all Local Governments, should be provided this full list to be able to undertake early due diligence on the land identified.

Without knowing what other Councils are being requested to consider, the Shire requested the Department to ensure that the Shire of Gingin and other Local Governments are not being targeted due to the commercial potential for land. There should be more clarity surrounding the lands that have been requested and identified across all Local Government and this be publicly accessible.

SECRETARIAT COMMENT

Background on the South West Native Title Settlement (Settlement):

The Settlement, in the form of six Indigenous Land Use Agreements (ILUAs), is a landmark native title agreement negotiated between the Noongar people and the State Government of Western Australia (State). The Settlement officially commenced on 25 February 2021, followed by the establishment of the Noongar Boodja Trust and the appointment of Perpetual as the initial Noongar Boodja Trustee on 29 March 2021. Following commencement, as prescribed by the ILUAs, native title rights and interests were surrendered on 13 April 2021, in exchange for a negotiated package of benefits that the State is delivering.

The Noongar Land Estate is a key benefit under the Settlement and will be comprised of up to 300,000 hectares of land handed over as reserve, and up to 20,000 hectares of land transferred in freehold. The first transfers of land to create the NLE were executed by all parties on 14 July 2021. The Department of Planning, Lands and Heritage (DPLH) is the agency responsible for the delivery of the NLE, on behalf of the Minister for Lands. The NLE is intended to provide significant opportunities for the Noongar people to achieve sustainable economic, social and cultural outcomes. The land to be transferred to the NLE is primarily drawn from unallocated Crown land (UCL), unmanaged reserves (UMR) and Aboriginal Lands Trust (ALT) properties within the Settlement area and will be determined through the ILUA-prescribed land identification, assessment and eventual transfer processes managed by DPLH over the five year ILUA implementation period. This work is undertaken consultatively with the Trustee, SWALSC and a broad range of key stakeholders.

A key component of this process is the Assessment Phase, at which point DPLH consults with stakeholders, including Local Government. Consultation with Local Government in this manner is consistent with general Crown land administration requirements, where tenure matters are referred for comment under section 14 of the *Land Administration Act 1997* (LAA). Referrals to Local Governments under the Settlement request detail (if available) on the following:

- whether there are existing interests in the land parcels under consideration for inclusion in the NLE that cannot be met elsewhere;
- whether there are future proposals for the same land or land within the same general location;
- whether there are planning scheme amendments that could affect future use of the land;
- whether there are other relevant land use, land management or land development issues; and
- any other advice they may wish to provide in relation to the subject land.

WALGA asked DPLH if it would it be possible to advise each Local Government of all of the land under consideration within their area at the same time, and DPLH responded as follows:

DPLH regularly provides Local Government Authorities (LGAs) with a list of unallocated Crown land (UCL) and unmanaged reserves (UMR) that may be eligible for inclusion in the Noongar

Land Estate within the boundaries of the LGA. This information is provided upon the request of the LGA, in the spirit of proactive and transparent engagement with key stakeholders.

Importantly, DPLH advise that the list provided is reflective of land under consideration at a specific point in time and may be subject to change. Further, all LGAs are advised that DPLH are progressing land through the Phases of the Noongar Land Base Strategy (Strategy) at Annexure J to ILUAs for the Settlement. The Strategy provides an agreed process to be followed and includes a five-year timeframe for the staged delivery of the full 320,000 hectare Noongar Land Estate. As a result, DPLH will likely engage with a number of the involved LGAs numerous times during the five-year period.

WALGA asked DPLH if a 3 month consultation period would be considered, and DPLH responded as follows:

Consultation with LGAs is consistent with general Crown land administration requirements, where tenure matters are referred for comment under section 14 of the LAA. The 40 day timeframe for consultation is prescribed by the Noongar Land Base Strategy (Strategy) at Annexure J to the ILUAs. The sections of the ILUA (including the Settlement Terms) can only be varied by agreement in writing that is executed by or on behalf of the State, each of the Government parties, each Regional Corporation or the relevant Native Title Agreement Group and the Central Services Corporation.

The timeframe for consultation with LGAs is outlined under the Strategy and is intended to ensure the structured delivery of State Government and Trustee for the Noongar Boodja Trust (Trustee) obligations relating to the handover of land. DPLH would also like to emphasise that the LGAs are asked to consider the change of tenure only, not a proposal for the use / development of the land.

The Strategy and therefore the activities of DPLH are consistent with best practice Crown land administration activities, though with prescribed timeframes to ensure adherence to tight project timeframes. The referral questions posed by DPLH during consultation with LGAs are intended to collect detail on what is known to apply to the land at the time of the referral, noting that detailed due diligence and site-specific investigations would need to be undertaken by the Trustee at the point of land use / land development. In the event that an LGA is unable to provide the detailed information within the 40 day timeframe, DPLH is able to discuss and possibly grant timeframe extensions on a case-by-case basis.

WALGA asked DPLH if it was possible to advise Local Governments, at the time of request, as to the intended use of each parcel of land eg cultural or economic development, and DPLH responded as follows:

This information is not provided to DPLH by the representatives of the Noongar people. Instead, the flexible reserve purpose of Noongar Social, Cultural and / or Economic Benefit and the flexibility provided by delivering freehold tenure allows for land to be used by the Trustee in line with the aspirations of the Noongar people – in accordance with the applicable statutory and policy framework. LGAs will retain standard decision-making powers relevant to the use and management of land, under the Local Planning Scheme / Town Planning Scheme and any applicable statute.

The Noongar Land Estate will be a diverse landholding across the six ILUA Areas and approximately 101 involved LGAs. The consultation process undertaken by DPLH is intended to ensure that LGAs can disclose relevant information to inform the decision-making of the Trustee as to whether or not the land should be included in the Noongar Land Estate. Decisions around whether or not land is Cultural Land, Development Land or a combination of both is for the Trustee to make in consultation with the relevant Noongar Regional Corporation after land is accepted for transfer, and may have relevance to the future management of the land.

However, LGAs can safely assume that land included into the Noongar Land Estate will be used and managed in accordance with the applicable zoning.

WALGA advised DPLH that generally, a Local Government would consult with their local community about changes to the use of Local Government managed land, and that the 40 day consultation timeframe did not allow for this. DPLH responded as follows:

LGAs may elect to undertake consultation with community regarding tenure change proposals, but it is not a requirement of the Strategy nor of the State Government more broadly. DPLH recommends that the standard approach taken by LGAs for any other Crown land administration matters referred by DPLH is the example to follow.

Community consultation may be more appropriate at the point of a development proposal being submitted to the LGA by the Trustee, as all detail requested above would be known and consultation can be well-informed. It is understood that consultation with community on development proposals is commonly undertaken by LGAs before consideration of a proposal by Council.

Please be advised that UCL and UMR (and Crown land more broadly) are the jurisdiction of the Minister for Lands, and while LGAs may have a role in regulating or to an extent managing UCL and UMR, this role does not form an interest in the land or a veto power for tenure proposals over the land.

DPLH made the additional further comment:

DPLH undertakes comprehensive consultation on land under consideration for possible inclusion in the Noongar Land Estate to obtain any and all information that may be relevant to the future use and management of the land by the Trustee. This includes all relevant LGAs and key State Agencies including the Department of Mines, Industry Regulation and Safety, the Department of Biodiversity, Conservation and Attractions and the Department of Water and Environmental Regulation. Service providers are also consulted on each land parcel.

All are provided with a 40 day timeframe for providing a response. At present, DPLH is actively progressing approximately 100,000 hectares of land across the six ILUA Areas through the Phases of the Strategy towards formal offer to the Trustee. The scope of this process is substantial, so the timeframes within the Strategy are critical for ensuring information collection can occur in a timely manner.

3.7. Land Offset Compensation to Local Governments

Shire of Gingin

RESOLUTION

Moved: President Cr Wayne Fewster, Shire of Gingin

Seconded: Cr Andrea Vis, Shire of Gingin

That WALGA advocate to the State Government that the Developer requiring land offsets should be required to provide the offsets within the Local Government where the clearing occurs and where this is not possible, the Developer requiring land offsets within another Local Government be required to pay a fee to the Local Government for the loss of rates and ongoing maintenance of infrastructure to the Land.

CARRIED

MEMBER COMMENT

It is proposed that Councils similar to the Shire of Gingin who are having large sections of rateable land locked away due to Developer Land Offsets need to be compensated for the loss of revenue.

The Shire of Gingin recently met with the Department of Biodiversity, Conservation and Attractions (DBCA) representatives regarding this matter, and they agreed that the Shire of Gingin is being targeted due to the type of Banksia bush that is within the Shire. The Shire of Gingin is not and will not be the only Local Government targeted through this type of scheme into the future.

The issues for the Shire of Gingin, other Local Governments and future Local Governments are as follows:

1. The requirement of land offsets is currently 1/7. Being that for every acre of land required by a developer, seven acres needs to be provided as offset.
2. What is currently rateable land for the Shire is being purchased and then handed to DPIRD for management.
3. The Shire of Gingin's loss of rates on a once off may seem minimal (last year the reduction was approximately \$10,000) but accumulating every year and then compounding becomes a significant amount of future income.
4. Council still needs to maintain the assets surrounding the site, providing access and egress from the blocks for DBCA and other adjoining ratepayers.
5. The land within the Shire of Gingin is in high demand due to its proximity to the metropolitan area and intensive agriculture and horticulture is dominant.
6. DBCA receives a 7-year management payment from the Developer to manage the newly offset land which is not enough for DBCA to manage the property, yet Council receives nothing other than a negative rates bill and continuous maintenance cost.
7. Whilst the metropolitan based Developer is making large amounts of money from the development and the metropolitan Council is receiving an increased rate book, the loser in the equation is the Local Government where the land is being offset and DBCA.
8. The current amount of non-Rateable land within the Shire is in excess of 30% and growing each year.
9. The additional land that is added to DBCA requires this Department to be appropriately funded, however advice received is that DBCA is underfunded and this in turn affects Local Government in regard to land management and increased fire risk.

The Shire of Gingin is not unique with this matter, however we are being significantly affected at this current time and will be well into the future and as such, request that WALGA advocate to the State to ensure that Local Governments losing rateable land through offset purchases are properly compensated for the loss of rates and continued maintenance.

SECRETARIAT COMMENT

In Western Australia, there are many reasons for land being transferred for public purposes to the Crown. In parts of the State, these lands represent significant portions of the total Local Government area, for example Local Governments with extensive areas of National Parks and State Forest.

The State Government Offsets Register shows offset land acquisitions or land transfers to conservation within these Local Government areas: Shires of Dandaragan, Gingin, Chittering, Waroona, Harvey, Augusta-Margaret River, Cities of Bunbury, Busselton, Mandurah and in the Perth metropolitan region.

Over 50 per cent of new housing construction in the Perth and Peel region is expected to be provided through greenfield development, indicating that the issue identified by the Shire of Gingin is likely to persist.

The requirement to provide environmental offsets is legislated through the Environmental Protection Act 1986 (WA) and under Part 9 of the *Environmental Protection and Biodiversity Conservation Act 1999* (Commonwealth). In Western Australia, offsets are implemented through the WA Environmental Offsets [Framework](#). A [review](#) of this framework was conducted in 2019.

WALGA's comments on the review advocated for adequate resourcing to manage offset lands to address any biosecurity and bush fire risk implications and to require that Local Governments be consulted regarding any proposed offsets in their areas. These points were also raised in WALGA Submissions on the Strategic Assessment for Perth and Peel and the [WA offset metrics guidelines](#).

Under the WA [Environmental Offsets Guidelines](#), it is the responsibility of the proponent to consult all relevant stakeholders regarding offsets, particularly those directly affected, including Local Government. The Guidelines identify the Department of Biodiversity, Conservation and Attractions (DBCA) as the key stakeholder in relation to offset planning due to their role as specialist scientific advisor and manager of the State's conservation lands.

In May 2022, the State Government released the Native Vegetation Policy for Western Australia, with a five year Implementation Roadmap which includes improvements to the environmental offsets framework. This will provide WALGA with the opportunity for continued advocacy on this issue.

3.8. Review of the Rating Methodology used by the Valuer-General

Shire of Serpentine Jarrahdale

RESOLUTION

Moved: President Cr Michelle Rich, Shire of Serpentine Jarrahdale

Seconded: President Cr Wayne Fewster, Shire of Gingin

Advocate for a full review of the rating methodology used by the Valuer-General to value all land in the State of Western Australia.

CARRIED

MEMBER COMMENT

The Valuer-General is an entity created under the *Valuation of Land Act 1978*. The Valuer-General forms part of Landgate's functions.

Landgate valuers conduct independent valuations of property based on the Gross Rental Values (GRVs) or and Unimproved Values (UVs) of a property.

These valuations are used by local governments, government agencies and emergency services as a basis to determine property rates, service charges and levies as well as land tax.

In Victoria, valuations are conducted using the capital improved value of a property. Capital improved value is based on the value of the land plus the buildings on it and any other capital improvements. This method may provide a more fair and equitable assessment of the value of land across various land uses in Western Australia including agriculture, residential, commercial and mining. This in turn would provide a more fair and equitable basis for local government rating.

A review of rating methodologies set in the *Valuation of Land Act 1978* would ensure that valuation methods relied upon by local government represent the most appropriate method.

SECRETARIAT COMMENT

WALGA currently does not have an advocacy position on which is the most appropriate valuation methodology.

3.9. WA Local Government Rating Model

Shire of Gingin

MEMBER MOTION

That WALGA advocate to the State Government and the Valuer Generals' Office that a different rating model be trialled across several Councils whereby the Unimproved Value rate is abolished, and all properties are rated for Gross Rental Value or Capital Value.

THE SHIRE OF GINGIN WITHDREW THE MOTION

MEMBER COMMENT

The Shire of Gingin and many other Local Governments struggle to have appropriate rates raised that are adequate for the correct use of the land within the Shire that addresses the impacts that these ratepayers have on the Shire's Assets.

For example, within the Shire of Gingin, there are large numbers of Unimproved Value (UV) rated properties that have large scale infrastructure servicing significant commercial operations but are captured within the definition as a Rural Pursuit. Some of these properties have tens of millions of dollars of infrastructure but only contribute a UV valuation and an additional differential rate.

If all properties were rated Gross Rental Value (GRV) or the rates based on Capital Value (value that the land would likely sell for on the open market), all rural land would still hold an appropriate GRV/Capital Value that would not be too dissimilar to their current rates, however those that intensify their land would achieve a naturally higher GRV/Capital Value making the rating across a Shire far more equitable, easier to manage and would simplify and reduce the cost of the valuation process.

Whilst not every Council may wish to take this step, it is proposed that the Local Government has the ability to review and decide if it wishes to remove the UV rate. With the Valuer Generals' Office conducting routine valuations for both UV and GRV it would not be out of the question for the valuation to be changed to meet this process.

It is noted that within South Australia and Victoria 89% of the Local Governments use Capital Value, Tasmania is progressing to Capital Value whilst New South Wales is based on Land Value only, Northern Territory is based only on Unimproved Capital Value, Queensland is Site Value and Unimproved Value and the ACT is Unimproved Value only. It is clear that whilst there is a range of valuations across Australia there is a bias growing towards utilising Capital Value of Land.

For example, we have a location within the Shire that has a water license and two bore holes. Whilst this is the extent of the infrastructure, they pump water out 24/7 for bottling in Perth, a GRV/Capital Value would be much higher in value to Council than the minimum rates currently being received. This company has significant heavy vehicles utilising Council roads every day of the week to keep up with the demand and creates significant road maintenance issues for Council.

The impacts of water licenses within the Shire have been dramatic as they are now a strong trading commodity and have doubled the value of land with a water license, yet it is not being considered by the Valuer Generals' Office as part of the overall valuation assessment of the land. Water licenses are incredibly valuable to producers as it increases their productivity and profits from smaller properties and as water licenses are very difficult to access, as allocations are full in most areas, many are trading or selling off portions of licenses clearly showing that water licenses have an inherent value that is increasing rapidly.

Again, the Shire calls on WALGA to advocate to the Minister and Valuer Generals' Office to undertake a review of the rating system to either abolish the UV valuation or provide the ability for the Local Government to choose its rating structure.

SECRETARIAT COMMENT

WALGA currently does not have an advocacy position on which is the most appropriate valuation methodology.

3.10. Reform of the *Cat Act 2011*

Shire of Capel

RESOLUTION

Moved: Cr Rosina Mogg, Shire of Capel

Seconded: Cr Christine Terranroy, Shire of Capel

That the WA Local Government sector requests the WA State Government prioritise reforms to the *Cat Act 2011*, in accordance with the Statutory Review undertaken and tabled in the State Parliament on 27 November 2019.

CARRIED

MEMBER COMMENT

Background

The Western Australian State Government through the (then) Department of Local Government released a Discussion Paper (January 2011) titled *Proposal for Domestic Cat Control Legislation*.

This consultation and proposed reform process ultimately led to the *Cat Act 2011* (Cat Act) receiving Royal Assent on 1 November 2012. The Cat Act fully commenced in 2013 and was introduced to:

- provide for the control and management of cats; and
- promote and encourage the responsible ownership of cats, and for related matters.

The Department of Local Government, Sport and Cultural Industries (DLGSC) commenced a statutory review of the *Cat Act 2011* and the *Dog Amendment Act 2013* in May 2019. The review undertaken by DLGSC was tabled in the WA Parliament by the Minister for Local Government on 27 November 2019.

Findings of the Review in relation to Cat Act included:

2. Registration of cats is strongly supported. The current three options for periods of registration should remain.
3. Registration periods for cats and dogs should be the same.
4. A central registration database for cats should be explored.
5. Feedback indicated that the wearing of collars and tags achieves the purpose of enabling a cat to be identified by rangers — including making it obvious that it is a domestic cat that has an owner. There is strong support for this to continue with no change.
6. Strong support from the public, local governments and industry exists for the practice of microchipping cats to continue.
7. Improvements could be made to the way microchip details are stored — this could be in either a national or State-based database.
8. Feedback indicated that education on the current requirements of microchipping, focusing on obligations of owners/breeders/rescues when a cat is transferred to a new owner and the need to keep information up-to-date, is necessary to achieve the desired outcomes of reuniting pets with their owners and the obligations of being a responsible cat owner.
9. There is strong support for cat numbers and confinement/curfews of cats to be implemented State-wide (in legislation) rather than through individual local laws — to provide consistency among local governments.
10. As a means of controlling cat numbers, there were multiple requests in the feedback received for the Cat Act to be brought into alignment with the Dog Act by placing greater restrictions on cat owners in relation to the number of cats that people can own.
11. The provisions in the Cat Act for cats to be sterilised should remain.
12. Feedback indicated that the age of cat sterilisation should be lowered, although further expert consultation on this will be needed.

Outcomes from the Statutory Review were:

- The *Dog Amendment (Stop Puppy Farming) Act 2021* received Royal Assent on 22 December 2021 with the aim to:
 - to amend the Dog Act 1976 to provide for matters relating to the sterilisation and breeding of dogs and the supply of dogs to and by relevant pet shop businesses;
 - to amend the Dog Act 1976 and the Cat Act 2011 to provide for a centralised registration system; and
 - to make other amendments to the Dog Act 1976

No further amendments, nor reforms of the *Cat Act 2011* have occurred since.

Comment

Any proposed changes to cat control measures should include public consultation.

The Shire of Capel hopes the State Government prioritises reforms of the Cat Act, similar to recent reforms with the Dog Act and Animal Welfare regulations.

The Shire of Capel supports a review of current cat control measures and to look at initiatives to better protect native wildlife, along with an accompanying education campaign.

Many Local Governments throughout the State have looked at similar reforms recently, however the current Act inhibits the control of cats and their impacts on native wildlife.

Shire understands that many people in the community love cats, with reforms looking to find a balance between valued family pets and protecting our unique and in some cases, endangered native animals.

SECRETARIAT COMMENT

This is a developing issue in the sector. A number of Local Governments have already attempted to make Cat Local Laws that seek to prohibit cats from roaming, require cats to be securely kept on premises of the owner, and prohibited from being in any public place. Parliament's Delegated Legislation Committee has disallowed a number of such attempts on the grounds that the local law-making head of power in the Cat Act does not contemplate local laws to be made for these purposes.

The Committees views are summarised in this excerpt from the Annual Report 2016 (Report 89 at 5.32):

In each of these cases, the Committee considered that the relevant provisions of the local law were inconsistent with or repugnant to the provisions of the Cat Act 2011 which:

- *allow for cats to be in public places unless they do not comply with the provisions of the Act requiring registration, microchipping and sterilisation*
- *empower the making of local laws prohibiting cats in certain specified areas.*

WALGA's current advocacy position supports a review of the Cat Act that will introduce broader powers of cat control.

3.11. WALGA Best Practice Governance Review – Principles

Executive Member motion

RESOLUTION

Moved: Cr Paul Kelly, Town of Claremont
Seconded: President Cr Phillip Blight, Shire of Wagin

That:

1. The update on the Best Practice Governance Review project be noted, and
2. The principles to inform WALGA's future governance model, as follows and as per the attached *Principles* document, be endorsed:
 - a. **Representative** – WALGA unites and represents the entire Local Government sector in WA and understands the diverse nature and needs of members, regional communities and economies.
 - b. **Responsive** – WALGA is an agile association which acts quickly to respond to the needs of members and stakeholders.
 - c. **Results Oriented** – WALGA dedicates resources and efforts to secure the best outcomes for Local Government and supports the delivery of high-quality projects, programs and services.

CARRIED

Attachment

- *WALGA Best Practice Governance Review: Principles*

Background

State Council commissioned the WALGA Best Practice Governance Review in March 2022 to ensure that WALGA's governance model is contemporary and agile and maximises engagement with members.

Governance Reviews allow organisations to re-examine their membership structure, constitution, board role, board composition, governance approach and policies.

For WALGA, the Best Practice Governance Review represents an opportunity to review and reshape the governance model to ensure WALGA is well-placed to:

- Deliver strong, clear, focused, and consistent policy positions on strategic matters of the most importance to Local Governments in WA,
- Drive advocacy outcomes and impact on behalf of Local Government in WA, and the communities they serve, and
- Embed agility and responsiveness, ensuring member concerns are heard, respected, and represented in a timely, efficient, and effective manner.

There are several drivers for the review.

WALGA's [Corporate Strategy 2020-2025](#) identifies the governance model as a key enabler of performance, with the following description: *We have contemporary governance and engagement models.*

Member and stakeholder feedback from a range of sources over several years has highlighted dissatisfaction with the governance model. Specifically, feedback relates to:

- **Structure** – WALGA’s governance structure is seen by members and stakeholders as creating roadblocks, hindering decision-making, and holding WALGA back.
- **Responsiveness** – there is a perception among members and stakeholders that WALGA’s governance model is slow and bureaucratic in an environment that requires agility.
- **Prioritisation and focus** – members and stakeholders acknowledge the challenges of developing unified Local Government policy positions and advocacy priorities given the diversity of Local Government sector interests.
- **Transparency and accountability** – feedback from members and stakeholders suggests that WALGA should be more transparent about its decision-making processes.
- **Zones** – Feedback from members and stakeholders in relation to Zones and Zone meetings is mixed. A proportion of WALGA’s membership believes that Zones are not as representative, strategic nor effective as they potentially could be.

Legislative reforms could also impact WALGA’s governance arrangements. The Minister for Local Government’s reforms to the *Local Government Act 1995* propose to remove WALGA from being constituted under the Local Government Act. Secondly, the Review of WA’s *Industrial Relations Act 1979* provides an opportunity for WALGA to be constituted as a registered employer organisation, which would enable WALGA to make applications in its own right on behalf of the sector.

Following several reviews and amendments, the Best Practice Governance Review also represents an opportunity to ensure alignment between WALGA’s governance documentation. In addition, State Council resolved in September 2021 for amendments to the Constitution to be developed to deal with matters related to State Councillors’ candidature for State or Federal elections.

To undertake the Best Practice Governance Review, State Council appointed a Steering Committee comprising the following members:

President Cr Karen Chappel JP	WALGA President (Chair)
Cr Paul Kelly	WALGA Deputy President
President Cr Phil Blight	Country State Councillor
Mayor Carol Adams OAM	Metropolitan State Councillor
President Cr David Menzel, Shire of Wyndham East Kimberley	Country Elected Member
Mayor Albert Jacob, City of Joondalup	Metropolitan Elected Member
Andrew Sharpe, City of Albany	Country Chief Executive Officer
David MacLennan, City of Vincent	Metropolitan Chief Executive Officer
Nick Sloan	WALGA Chief Executive Officer

The Steering Committee is supported by consultants PwC and WALGA officers, Tony Brown, Executive Director Member Services, Tim Lane, Manager Corporate and Association Governance, and Kathy Robertson, Executive Officer Governance.

The Steering Committee has met five times to late August and has:

- Endorsed terms of reference and an overarching project plan
- Considered the 2019 review including previous deliberations and outcomes
- Commissioned and considered work on comparator membership-based advocacy organisations:
 - Australian Hotels Association (AHA)
 - Australian Medical Association (AMA)
 - Chamber of Minerals and Energy (CME)
 - Chamber of Commerce and Industry (CCI)
 - Pharmacy Guild of WA

- Reviewed governance models of Local Government Associations in other States and New Zealand:
 - Local Government New South Wales (LGNSW)
 - Municipal Association of Victoria (MAV)
 - Local Government Association of Tasmania (LGAT)
 - Local Government Association of South Australia (LGASA)
 - Local Government Association of Queensland (LGAQ)
 - Local Government Association of the Northern Territory (LGAT)
 - Local Government New Zealand (LGNZ)
- Adopted a timeline for the way forward including member consultation and engagement, and
- Endorsed principles to be presented to the membership at the 2022 Annual General Meeting as per this agenda item.

SECRETARIAT COMMENT

Supported by State Council, the Steering Committee is putting forward principles to this Annual General Meeting to gauge member support for progressing the Best Practice Governance Review to the development of potential options for member consultation and engagement.

The principles put forward by the Steering Committee and endorsed by State Council at their 22 August 2022 Special Meeting, will guide the development of potential models for member consultation.

As per the attached Principles document, the three principles – Representative, Responsive and Results Oriented – comprise three or four components, component descriptions and governance implications.

Embedded in the governance implications are considerations for potential changes as well as principles that will be adhered to in the development of model options.

For instance, the principles propose that WALGA's governing body will:

- Maintain equal metropolitan and country representation,
- Continue the practice of electing the President from and by the governing body, and
- Facilitate responsive decision making with clear processes for members to influence policy and advocacy.

Potential models may be considered by the Steering Committee, and subsequently State Council and WALGA members, that could:

- Potentially lead to a reduction in the size of the governing body,
- Consider alternative election arrangements to the governing body, and
- Consider alternative arrangements to the existing Zones.

Following consideration of the principles at the 2022 Annual General Meeting, as per this item, an extensive consultation and engagement process will be undertaken with members on potential governance model options.

The consultation and engagement process will be undertaken during October, November, and December 2022. Feedback from member submissions, workshops, and discussions will inform a final report to be considered at February 2023 Zone meetings and subsequently, the March 2023 State Council meeting.

Constitutional amendments will then be prepared for consideration by State Council followed by the broader membership at the 2023 Annual General Meeting. As per WALGA's Constitution, amendments to the Constitution require endorsement by a 75 percent majority at both State Council and a general meeting of members.

The principles are put forward for member consideration.

Item 3.11 – Attachment: WALGA Best Practice Governance Review Principles

	Principle	Principle component	Component description	Governance implications
Representative	WALGA unites and represents the entire local government sector in WA and understands the diverse nature and needs of Local Government members, regional communities and economies.	Composition	The composition of WALGA's governance model represents Local Government members from metropolitan and country councils	The governing body will maintain equal country and metropolitan local government representation
		Size	An appropriate number of representatives oversees WALGA's governance	Potential reduction in the size of the overarching governing body
		Diversity	WALGA's governance reflects the diversity and experience of its Local Government members	Potential for the introduction of a mechanism to ensure the governance model comprises an appropriate diversity of skills and experience
		Election Process	Considers the processes by which WALGA's governance positions are elected and appointed	Consideration of alternative election and appointment arrangements, with the President to be elected by and from the governing body
Responsive	WALGA is an agile association which acts quickly to respond to the needs of Local Government members and stakeholders.	Timely Decision Making	WALGA's governance supports timely decision making	WALGA's governance model facilitates responsive decision making
		Engaged Decision Making	WALGA's Local Government members are engaged in decision making processes	WALGA's governance model facilitates clear and accessible processes for Local Government members to influence policy and advocacy with consideration to alternatives to the existing zone structure
		Agility	Considers the flexibility of WALGA's governance to adapt to changing circumstances	WALGA's governance model is agile and future proofed for external changes
Results Oriented	WALGA dedicates resources and efforts to secure the best outcomes for Local Government members and supports the delivery of high-quality projects, programs and services.	Focus	Considers the clarity and separation of responsibilities and accountabilities of WALGA's governance	Governance bodies have clearly defined responsibilities and accountabilities, with the capacity to prioritise and focus on strategic issues
		Value Added Decision Making	Facilitates opportunities for value to be added to decision making	Adoption of best practice board processes, and introduction of governance structures that are empowered to inform decisions
		Continuous Improvement	Considers regular review processes for components of the governance model, their purpose and achieved outcomes	WALGA's governance is regularly reviewed every 3 to 5 years to ensure the best outcomes are achieved for Local Government members

3.12. Special Urgent Business

Two items of Special Urgent Business were submitted to the meeting for consideration.

3.12.1. Abandoned Shopping Trolleys

City of Cockburn

RESOLUTION

Moved: Mayor Logan Howlett JP, City of Cockburn
Seconded: Cr Tarun Dewan, City of Cockburn

That the members agree that the following item of Special Urgent Business relating to Abandoned Shopping Trolleys be considered.

ABSOLUTE MAJORITY DECISION REQUIRED

CARRIED BY ABSOLUTE MAJORITY

MEMBER COMMENT

Many Local Governments (particularly metropolitan and regional areas) in Western Australia and other parts of Australia continue to experience abandoned shopping trolleys in suburbs adjacent to shopping centres.

While some local governments have introduced various policies, it remains as an issue for communities where shopping trolleys are left abandoned in their neighbourhoods.

The owners of supermarkets respond in different ways to the collection of these shopping trolleys or not all, even those that are known as national retailers.

Local Governments increasingly are collecting these trolleys, impounding them, charging a fee to the retailer to collect them, and in some cases are left to dispose of the shopping trolleys to scrap merchants when they remain uncollected.

RESOLUTION

Moved: Mayor Logan Howlett
Seconded: Cr Tarun Dewan

That this meeting supports the recent petition to be tabled in the Legislative Council, Parliament of Western Australia, "Removal and Abandonment of Shopping Trolleys 22-0017" calling on the State Government to implement stringent and uniform shopping trolley containment laws for the whole state of Western Australia.

CARRIED

3.12.2. Mandatory Superannuation for Elected Members in Band 1 and 2 Councils

City of Gosnells

RESOLUTION

Moved: Cr Sarah Patterson, City of Gosnells

Seconded: Cr David Goode JP, City of Gosnells

That the members agree that the following item of Special Urgent Business relating to Mandatory Superannuation for Elected Members in Band 1 and 2 Councils be considered.

ABSOLUTE MAJORITY DECISION REQUIRED
CARRIED BY ABSOLUTE MAJORITY

MEMBER COMMENT

The exclusion of superannuation for Elected Members has significant financial implications for young Elected Members and disproportionately for women.

Minister Carey this morning expressed his support for mandatory superannuation for Local Government Elected Members in Band 1 and Band 2 Councils. Minister Carey acknowledged financial implications are cost prohibitive for Band 3 and Band 4 Local Governments. Which is why, we ask for the support of mandatory superannuation for Bands 1 and 2 and voluntary for Bands 3 and 4.

RESOLUTION

Moved: Cr Sarah Patterson, City of Gosnells

Seconded: Cr David Goode JP, City of Gosnells

That this meeting supports requesting WALGA to advocate for the Local Government reforms to include mandatory superannuation for elected members of Band 1 and Band 2 Councils and supports the optional payment of superannuation for Band 3 and 4 Councils.

CARRIED

4. Closure

The Chair declared the meeting closed at 12:43pm.

DECLARATION

These Minutes will be confirmed at the 2023 Annual General Meeting.

SHICC PUBLIC HEALTH BULLETIN #36

Wednesday 5 October 2022 14:00 Hours

This bulletin has been authorised by **Incident Controller**, Dr Revle Bangor-Jones

COVID-19 case and vaccination numbers

- **WA:** [Weekly statements](#), [Vaccination dashboard](#) and [WA COVID-19 data update](#)
- **National:** [Current National Status and Australia's vaccine roll-out](#)
- **Worldwide:** [WHO Situation Reports](#) and [WHO Dashboard](#)

Living with COVID

Chief Health Officer advice

The latest advice from the Chief Health Officer is available [here](#).

National isolation agreement reached

Mandatory isolation requirements for COVID-19 cases and close contacts will end from Friday 14 October 2022. This decision was made at [National Cabinet](#) on 30 September 2022.

National Cabinet agreed to the end the Pandemic Leave Disaster Payment effective the same date. To support the most vulnerable and those in high-risk settings, targeted financial support will be available for casual workers in aged care, disability care, Aboriginal health care and hospital care sectors.

The removal of the mandatory isolation requirement does not mean the pandemic is over. Individuals and businesses are encouraged to remain vigilant and protect themselves and the community against COVID-19.

Until 14 October 2022, the current mandatory isolation requirements for [COVID-19 cases](#) and [close contacts](#) remain in place.

Continue to monitor the [Department of Health](#), [HealthyWA](#) and [WA Government](#) websites for the most up-to-date advice.

New Bill introduced to WA Parliament

The WA Government has introduced a Bill into State Parliament to provide a new framework to manage COVID-19.

The new framework will allow for a 'Temporary COVID-19 Declaration' for the continuation of public health measures to manage COVID-19 in the community without a State of Emergency declaration. It will not allow the closure of State borders.

Refer to the [media statement](#) for further information.

GP referral for private PCR testing

A reminder that patients need a referral from a GP or other medical practitioner to access [PCR testing](#) by private pathology providers.

People who are close contacts or with COVID-like symptoms can continue to receive PCR testing without a referral at Public COVID clinics. These clinics are at Joondalup Hospital, PathWest Murdoch drive-through, Rockingham Hospital drive-through and Royal Perth Hospital in the metro area, and at regional testing locations as [listed](#).

In most circumstances, a rapid antigen test (RAT) is suitable to test for COVID-19 and is safe, convenient and fast.

Information for employers

The WA COVID-19 Test Trace Isolate Quarantine Plan (TTIQ Plan) and the Health Care Worker (HCW) Furloughing Guidelines have been removed from the WA Health website.

Relevant information previously available in these documents is now available at the [COVID-19 in the workplace](#) web page, which includes:

- information to prevent and manage COVID-19 in the workplace
- requirements for asymptomatic close contacts to attend work in non-high risk and in high-risk settings (including HCWs in health care settings)
- links to key resources including HealthyWA case and close contact isolation information, COVID-19 infection prevention and control advice on cleaning and disinfection and COVID-19 vaccination information.

Specific guidance for the management of acute respiratory infection in residential aged care facilities in WA is available at the *COVID-19 information for aged care and community care providers* page of the Department of Health [website](#).

Weekly reporting period

The Department of Health has transitioned to a weekly COVID-19 statement, in line with a national approach. Western Australia (WA) case data is now available every Friday via the [statement](#) on the Department of Health website.

COVID-19 vaccination program

Bivalent Original/Omicron (Moderna) vaccine included in COVID-19 vaccination program

The Australian Technical Advisory Group on Immunisation (ATAGI) has [advised](#) that the Bivalent Original/Omicron (Moderna) will be included in the COVID-19 vaccination program for boosters in people aged 18 years or older from 10 October 2022.

This Moderna bivalent vaccine can be used as an alternative vaccine for any booster dose in people aged 18 years or older according to the current ATAGI [recommendations](#) for booster doses. ATAGI does not currently recommend use of the Moderna bivalent vaccine as a booster in anyone under 18 years as it is not registered for this age group.

It is not recommended for the primary course of vaccination (first two doses in most people or first three doses in severely immunocompromised people).

The Moderna bivalent vaccine will be available from participating pharmacies, which can be found on the [Vaccine Clinic Finder](#).

Updated ATAGI recommendations fact sheet

ATAGI fact sheet with [recommendations](#) on the use of a third primary dose of COVID-19 vaccine in individuals who are severely immunocompromised has been updated.

Updates include recommendations:

- for children aged 6 months and older
- on the use of Nuvaxovid (Novavax) COVID-19 vaccine.

Co-administration with other vaccines in children aged 6 months to <5 years

In children aged 6 months to <5 years, ATAGI [recommends](#) (where possible) a minimum interval of 7 to 14 days between a Spikevax (Moderna) COVID-19 vaccine and other vaccines to minimise the risk of adverse events such as fever.

Moderna paediatric COVID-19 vaccine can be co-administered with other vaccines if separation of vaccines would be logistically challenging, such as with outreach programs, in remote areas, or for children receiving complicated catch-up schedules.

- **National:** [Current National Status and Australia's vaccine roll-out](#)
- **Worldwide:** [WHO Situation Reports](#) and [WHO Dashboard](#)

Living with COVID

Chief Health Officer advice

The latest advice from the Chief Health Officer is available [here](#).

Mandatory isolation requirements removed

Following an agreement at [National Cabinet](#), the mandatory isolation requirements for COVID-19 positive cases and their close contacts were removed on 14 October 2022.

However, Western Australians are still encouraged to take steps to reduce the spread of COVID-19 and protect others.

Anyone who is [COVID-19 positive](#) or experiencing [symptoms](#) (runny nose, sore throat, cough, fever) is strongly encouraged to stay home until they have recovered.

It is recommended that those with COVID-19:

- stay at home for at least 5 days and until symptoms clear
- register their positive rapid antigen test (RAT) with [WA Health](#)
- don't visit people at high risk of severe illness, such as aged or disability care facilities or healthcare facilities, such as GPs, physio or dentists for 7 days after testing positive
- notify their employer and discuss when to return to work.

Guidance for COVID-19 [cases](#) and [close contacts](#) is available at the [HealthyWA](#) website. Information for employers and employees is available at the [Department of Health](#) website.

Exclusion period

While mandatory isolation requirements for COVID-19 cases and close contacts has been removed, some settings require ongoing risk management to protect those most vulnerable to severe illness.

People who work in a public hospital or public healthcare facility **cannot** attend work for 7 days after testing positive for COVID-19.

To protect those most at risk from COVID-19, for 7 days after testing positive to COVID-19, workers and visitors:

- **must not** enter public health service facilities including public hospitals, public mental health services and public community dental services
- **should not** enter high-risk settings including disability and mental health and aged care residential facilities and healthcare settings (e.g. private hospitals, ambulance services, GP clinics, physiotherapy).

Asymptomatic close contacts who work in high-risk settings can attend work with the agreement of their employer, provided they meet [certain conditions](#).

The [WA Health COVID-19 Framework for System Alert and Response \(SAR\)](#) was developed to provide proactive and coordinated guidance to the WA health system to respond to the changing risks of COVID-19. Private hospitals and healthcare settings are not required to follow this framework, however, may use it as a guide when creating their own policies.

Masks still required in high-risk settings

[Masks](#) are still required for people aged 12 years and over (year 7 and over for schools):

- at hospitals and healthcare settings
- at residential aged care facilities and other residential care facilities
- in ambulance and patient transport services
- at primary health clinics (including general practitioner clinics, Aboriginal health services, private nurse offices and maternal, child, and dental health clinics)
- at specialist outpatient services and day procedure centres
- at allied health services including radiology, physiotherapy and occupational therapy services.

Masks are not mandated for healthcare settings that do not have face-to-face interaction with patients (including telehealth services, pathology laboratories and corporate areas within health facilities).

If you believe you need wear a mask in certain circumstances, you are encouraged to do so.

Refer to the [HealthyWA](#) website for additional information.

Closure of Rockingham and RPH COVID clinics

In line with the wide accessibility of RATs, two state-run testing clinics will be closing.

- Rockingham COVID clinic will close on Friday 21 October 2022
- Royal Perth Hospital COVID clinic will close on Friday 28 October 2022.

The remaining [COVID clinics](#) at Murdoch, Joondalup, Broome and Bunbury will continue to provide PCR tests until further notice.

GP referral for private PCR testing

A reminder that patients need a referral from a GP or other medical practitioner to access [PCR testing](#) by private pathology providers.

People who are close contacts or with COVID-like symptoms can continue to receive PCR testing without a referral at Public COVID clinics. These clinics are at Joondalup Hospital, PathWest Murdoch

drive-through, Rockingham Hospital drive-through and Royal Perth Hospital in the metro area, and at regional testing locations as [listed](#).

In most circumstances, a rapid antigen test (RAT) is suitable to test for COVID-19 and is safe, convenient and fast.

New Bill introduced to WA Parliament

The WA Government has introduced a Bill into State Parliament to provide a new framework to manage COVID-19.

The new framework will allow for a 'Temporary COVID-19 Declaration' for the continuation of public health measures to manage COVID-19 in the community without a State of Emergency declaration. It will not allow the closure of State borders.

Refer to the [media statement](#) for further information.

COVID-19 vaccination program

State-run vaccination clinics update

State-run vaccination clinics across Western Australia are [scaling down](#), with pop up clinics to continue for target priority groups.

Vaccines are still available from participating GPs and pharmacies for those requiring vaccinations. People should visit [Roll up for WA](#) or [VaccinateWA](#) for provider locations and booking details.

The State-run vaccination clinics at Claremont Showgrounds, Armadale, Maddington and Wanneroo were recently closed. The other clinics will close in a phased approach - Joondalup on 27 October, Midland on 29 October, Mirrabooka and Kwinana on (6 November).

Scaling back State-run vaccination clinics will free up resources and staff to devote time to pop-up clinics, with some staff returning to other roles within the health system.

Bivalent Original/Omicron (Moderna) vaccine included in COVID-19 vaccination program

As [advised](#) by the Australian Technical Advisory Group on Immunisation (ATAGI), the Bivalent Original/Omicron (Moderna) is now included in the COVID-19 vaccination program for boosters in people aged 18 years or older.

This Moderna bivalent vaccine can be used as an alternative vaccine for any booster dose in people aged 18 years or older according to the current ATAGI [recommendations](#) for booster doses. ATAGI does not currently recommend use of the Moderna bivalent vaccine as a booster in anyone under 18 years as it is not registered for this age group.

It is not recommended for the primary course of vaccination (first two doses in most people or first three doses in severely immunocompromised people).

The Moderna bivalent vaccine will be available from participating pharmacies and GPs, which can be found on the [Vaccine Clinic Finder](#).

Media release

19 October 2022

Trial to increase rural power supply allocation

Western Power is trialling an increase in rural supply allocations in parts of the South West and Wheatbelt regions between now and 31 March 2023.

The trial is being delivered following a review by Western Power to assess community needs and network capacity for regional and rural power supply allocations.

Homes and businesses in the Shires of Boyup Brook, Bridgetown-Greenbushes, Collie, Donnybrook-Balingup, Nannup, West Arthur and Williams will be able to install a main switch circuit breaker of equal rating to those required in urban areas – 63 Amp.

This is an increase from the current 32 Amp supply allocation for single phase connections in regional and rural areas.

Western Power Executive Manager for Asset Management Gair Landsborough said the review had considered recent community and industry feedback on the updated WA Services and Installations Requirements, which was introduced in August 2021.

Under these Requirements, a safety main switch circuit breaker must be installed for all new connections to the grid, including when a new circuit is added to an existing connected premise.

“The circuit breaker requirement was critical to ensuring the safe management of the network and to align with the evolving renewable energy market, as well as Australian standards,” Mr Landsborough said.

“To ensure we’re meeting community needs, we launched a review of the regional and rural supply allocations.”

“With the accelerated roll-out of Advanced Metering Infrastructure, we were able to gather more detailed data and information than ever before – allowing us to model current and future regional network usage.”

“The data showed that the existing electrical infrastructure can support an increase in regional load, with network reinforcements to be implemented through our forward planning.”

“The trial will further support that the rural supply allocation is fit-for-purpose and we’re confident we’ll be able to standardise this, but we need to ensure this is managed in a safe and reliable way.”

“Main switch circuit breakers support the safety of the community and the network, as they’re designed to provide overload protection for a household if connection service capacity is exceeded, preventing significant outages and damage to equipment and appliances.”

“Additionally, they ensure safe and equitable access power supply for the whole community and support the growth of renewable energy and rooftop solar and battery storage systems,” he said.

Electrical contractors remain obligated to assess household demand requirements when adding new circuits for property owners and apply for an upgraded supply allocation where necessary.

Homeowners are responsible for managing their electrical load and should seek electrical contractor advice when adding or replacing larger appliances or equipment.

For more information and the stay up to date on power supply allocation and main switch circuit breakers, visit <https://www.westernpower.com.au/community/news-opinion/rural-power-supply-allocation-increase-trial>

About Western Power:

Western Power is a Western Australian State Government owned corporation responsible for building, maintaining and operating an electricity network which connects our 2.3 million customers to traditional and renewable energy sources, delivering a critical service to the community.

We're at the forefront of the energy industry in leveraging new technologies, including integrating microgrid and battery storage solutions. We're planning the grid of the future that's leading the way to a cleaner, brighter and more resilient energy supply for the next generation.
